Overview

- Quiz
- The basic elements
 - The Audience
 - Organizing the Presentation
 - Voice and Language
 - Body Language and Gestures
 - Visual Presentations

AUDIENCE

Which combination do you like?

What?

What?

Audience

- Interpretative communities
- Culture and interpretation
 - Black and white
 - Red

Audience

- Ambiguity: open and closed

**Please bring that chair.
I wish to sit on it.**

**Please bring the fire.
I wish to think on it.**

Audience

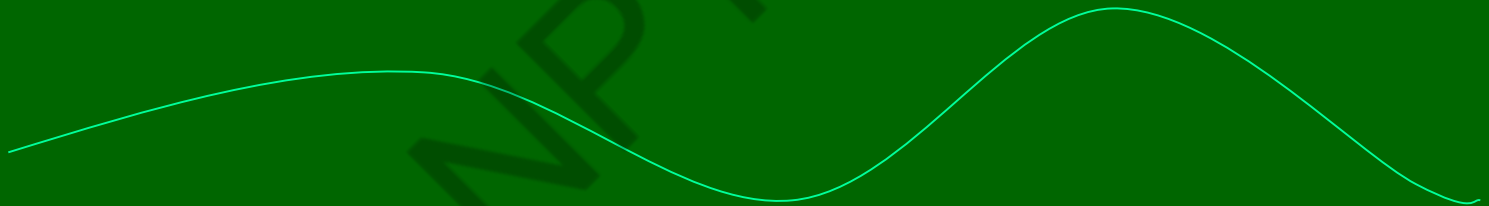

- Context

**Please bring the fire.
I wish to think on it.**

A caveman

A Philosopher

Kashmir

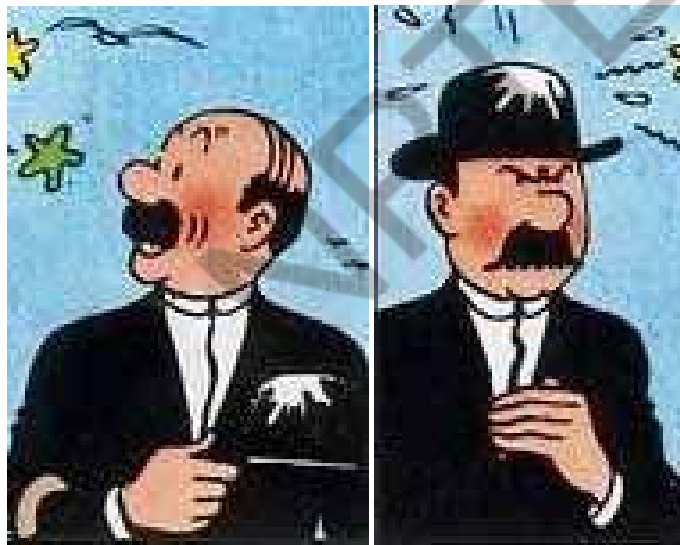

NPTTEL

kashmir

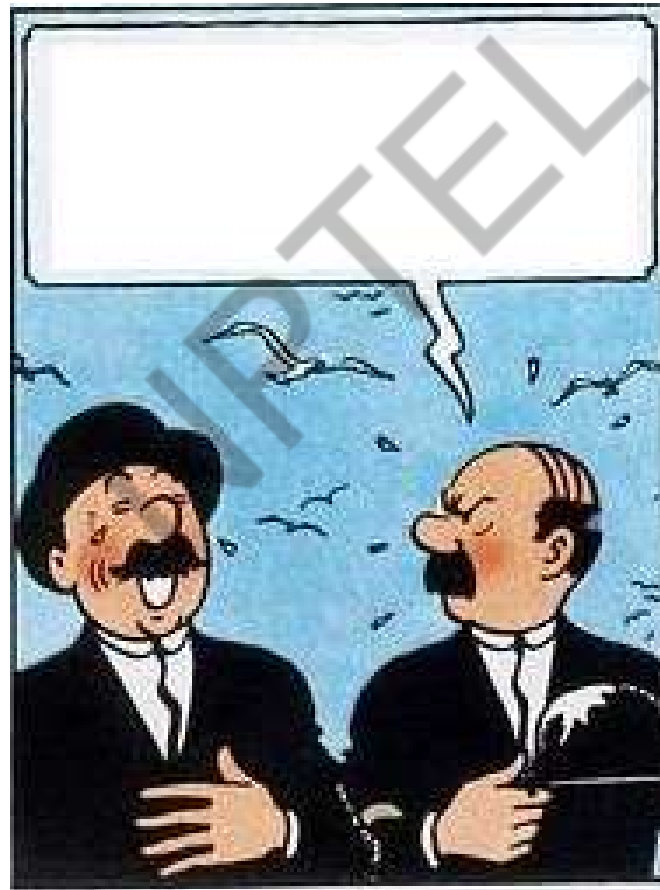

Audience

- Context: Images and their relation

Audience

Audience

- Culture
 - Pepsi
 - Kalipuja

NPTEL

Kalipuja

Kalipuja

Audience

- Message: Is the meaning clear?
 - An artist has to undergo extreme measures in order to achieve a certain degree of meritoriousness in the prowess he is able to manifest.
 - An artist has to work very hard to achieve a certain degree of skill and to reflect it in his work.

Audience

- Who is your audience?
- What brings them together?
- What level, how technical?
- What do they expect, want?

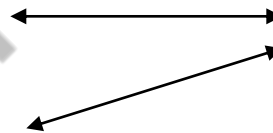

Audience: Response

- Author and intention
- Live: two way communication

Presentation

Questions

Clarifications

ORGANIZATION & PRESENTATION

Organization & Presentation

- Who are you talking to?
- What do you wish to convey?

Presentation

- Introduction
- Body
- Conclusion

NPTEL

Organization: Presentation

- Questions and answers
- Conclusion first

NPTEL

Organization: Planning

- Outlining
- Mind mapping
- Storyboards
- Flow
- Timing
- Summary

NPTEL

Planning: Outline

Outlining

The outline is one of the most familiar organizational tools. Almost any talk you can imagine could be built on this general outline:

1 *Introduction*

- (a) What the talk is all about
- (b) Necessary background information

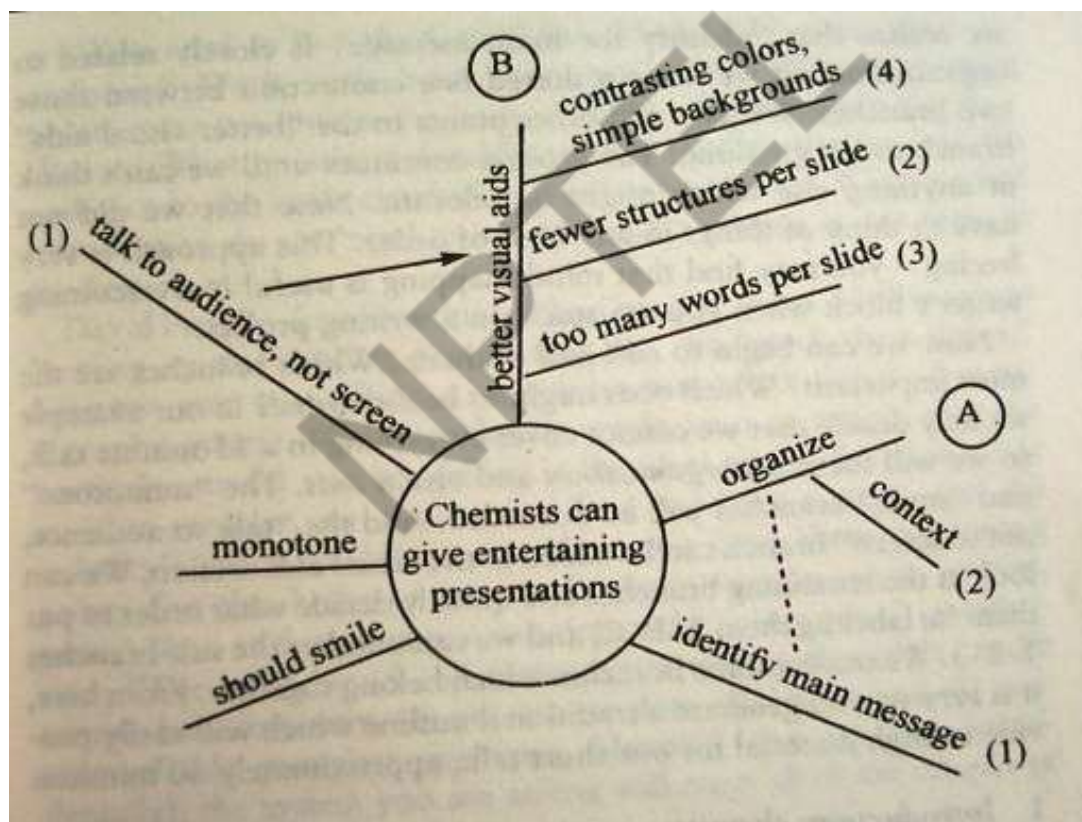

2 *Body: telling and supporting the main message*

- (a) First supporting point
- (b) Second supporting point
- (c) Third supporting point (plus as many supporting points as you think you need, but keep in mind that more than seven points is probably too overwhelming to your audience)

3 *Conclusion*

- (a) Summarize the supporting points
- (b) Reiterate the main message

Planning: Mind Map

VOICE & LANGUAGE

Voice

- Volume

“Microphone! Do I look like a guy who needs a microphone?”
He thinks. “Can everyone hear me?” He shouts. Of course everyone hears him. He is shouting.

And those who don’t, miss the question. So everyone is quiet.

Voice

- Pacing

The paper is 15 pages long. He is allotted 15 minutes. He has to finish it on time. He starts reading. But no one manages to follow him.

Voice

- Pacing
- Speak slowly
- Give pauses. Short pauses between sentences. Long pauses where there are breaks in paragraphs or when moving on to new points.
- Avoid monotony: bring in variations

Voice

- Vocal Variety
 - Vary the pace
 - Vary the volume
 - Vary the intonation
 - Give breaks or long pauses to show some visual or to tell an anecdote

Language

- Choice of words
 - One notices active involvement on his side
 - He is actively involved
- Use simple words
- Avoid using jargons, especially if the audience is not from your field
 - To deconstruct a sentence also means to subvert its lexicon

Language

- Work on your pronunciation
- Practice before the presentation
- You can use a tape to get a feed back on your speech
- Time your delivery

Overview

- Body language
- Visual presentation
- Slides and PPTs
- Summary
- References

Body Language & Gestures

Body Language & Gestures

- Roland Barthes, a French Philosopher, suggests that the combination of food you order in a restaurant also sends a message about your taste, your social status and your personality.
- How you dress, how your body is poised, how you gesticulate also make an impression on the audience.

Body Language & Gestures

- First impression
 - Even before I speak, when I came into this room, you must have formed your opinions about me. How did you do that?
 - **My appearance**
 - **What I wear**
 - **How I walk in, how my body is poised**
 - **How I establish eye contact**

Body Language & Gestures

- Face
 - Communicate your enthusiasm
 - Smile
 - Establish eye contact with your audience
 - **Small group – individually**
 - **Large group – divide audience into units in space**

Body Language & Gestures

- Posture
 - Don't lean on things, don't sag your shoulders, don't hide behind the lectern, don't fold your arms across your chest. They might be understood as defensive postures.
 - Don't be stiff, try to be relaxed.

Postures to be avoided

Allan & Barbara Pease

Confidence?

Allan & Barbara Pease

Expressions best avoided

Body Language & Gestures

- Reading the audience
- It is important to get a feedback on how the audience is responding to your talk. Is it critical? Is it hostile? Is it aggressive? Is it interested?
 - Very often body postures might tell us something.

Audience Response

Audience Response

Blank stare
Drooping eyes
No blinking
Head in hands
Little eye contact
Crossed legs
Doodling
Repetitive tapping

VISUAL PRESENTATION

Basic Elements

- Layout
- Colour
- Images
- Clips and Sound
- Animation
- Text
- Others

Layout

- Basic design
- Standardization and innovation
- Elements
- Planning texts and images

Colours

- Foreground and background colours
- Primaries and secondaries
- Colour and emotion
- Colour and association
- Colour and culture

Colours

Georges Seurat, Bathers. (Wikipedia)

Colours

Edvard Munch: The Cry/Scream (Wikipedia)

Images

- Tables and graphs
- Images and illustrations
- Relating images and texts
- Images and symbolism
- Communicating with images

Clips and Sound

- When to insert clips and sound
- Where to insert clips and sound
- Background music
- Interactive sound

Animating Presentation

- Demo 1
- Abacus
- Burmese
- Cat
- Donkey
- Etc

NPTEL

Animating Presentation

- Demo 2
- Abacus
- Burmese
- Cat
- Donkey
- Etc

NPTEL

Animating Presentations

- Basic dos and don'ts
- Effects
- Order
- Standardization and variations

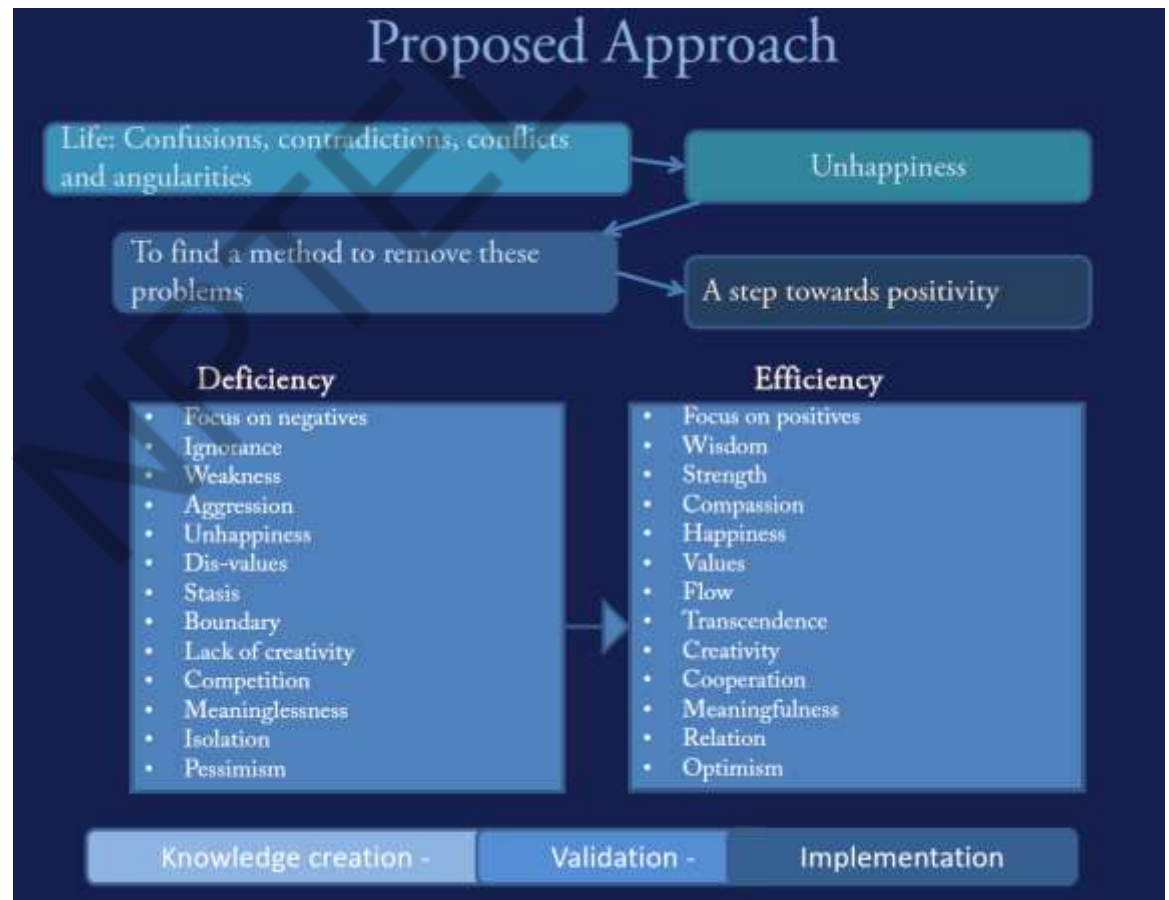

Working with Texts

- Text as elements of design and layout
- Communicating through texts
- Basic dos and don'ts

Other Related Aspects

- Links within presentations
- Links to other presentations
- Links to other applications
- Handouts
- Notes

Sample slides

Broad Research Themes

- Confusions & conflicts
- Hope and optimism
- Emotions
- Values and virtues
- Resilience
- Self-improvement
- Generosity
- Creativity
- Spirituality
- Yoga and meditation
- Compassion
- Meaningfulness
- Happiness

The themes identified are areas where the team has already done work. They are also linked to one another.

Approaches to be used for investigation

Biological

Social

Behavioral

Happiness and wellness

Education technology development

- Student assessment
- Student aids
- Online courses
- Centre activity dissemination??

We are digitally linked. While technology cannot replace humans, it can always help. At IIT Kharagpur, we have both the technology as well as the dissemination infrastructure.

The scream

The destitute

Terror on a bridge

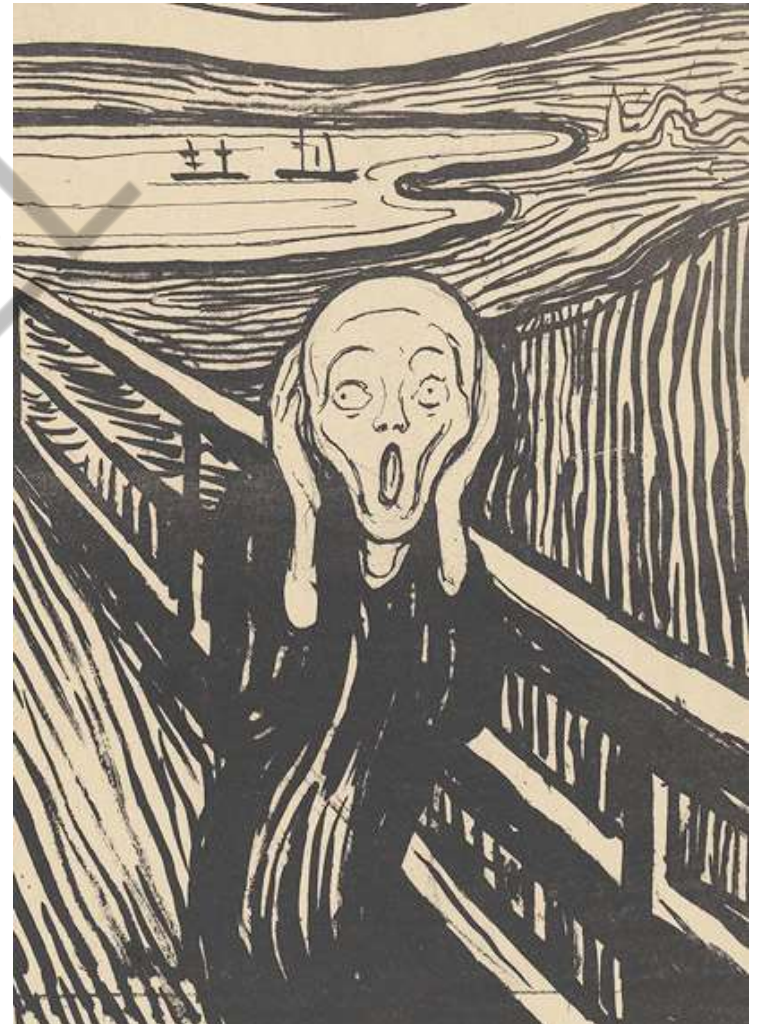

Image and text

- Meaning gets generated through the interaction of words and images
- The title, which generates expectations about a story, in a painting is more interactive, generating a particular set of meanings

Image and story-telling styles

- Let us look at a few examples

NPTEL

Will Eisner, 1985

Only words

SHE: "Oh,
how my life
is spent —
ruined by
living with
you."

HE: (. . .
No answer)

SHE: "You
stupid fool
. . . look at
you! A
weak
nobody."

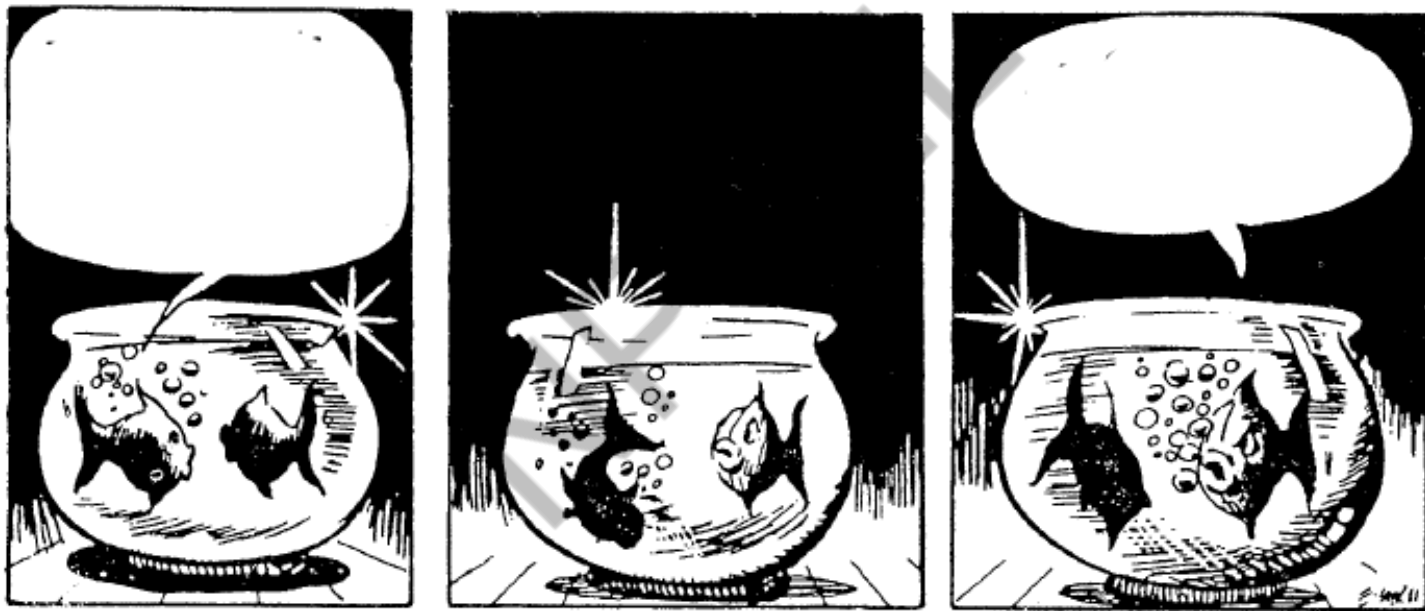

SHE: " Stop
sitting at
the TV day
after day.
You do
nothing!!
Nothing! "

SHE:
"Listen,
I'm telling
you I'm not
going to
take much
more of
this."

HE:
(Thinking.)
I can't
stand it
anymore
. . . her
damn
nagging.

Communication Styles

by

Dr. Vijai N. Giri

Professor of Communication Studies

Dept. of Humanities & Social Sciences

IIT Kharagpur

email: vng@hss.iitkgp.ernet.in

- Communication originates from the Latin word “**communis**” which means “to make common.”

**There is a direct link between the
quality of our communication and the
quality of our life.**

The first step towards effective communication with others is successful communication with yourself.

**We must either learn to live
together or increase our chances
of prematurely dying alone.**

Communication Style

- **One's style of communication can be the source of many problems. Marriage counsellors and divorce lawyers indicate that a breakdown in communication is the most frequently cited reason for relational dissolution in the United States.**
- **A specific kind of communication that is, public speaking, is one of the most frequently cited fears people have, even more than they fear death.**
(James W. Neuliep, 2009)

Generally, people do not react to what we say; instead, they react to how we say.

Someone has said:

Motivation is everything.... and the only way to motivate people is to communicate with them. It is important to talk to people in their own language.

Communication style is the language that exists within all languages, and shows us how to use style to get others to *follow us to death*.

Styles mean the way we communicate. Communication style is a matter of choice. Effective communicators develop the ability to use more than one style.

In the rhetorical tradition,
Noble is very Aristotelian
Socratic is akin to Socrates and the
Reflective is reminiscent of Plato.

The Noble Communication Premise

The Noble is a true believer who expects the personal feelings of the self to play a secondary role in the communication interaction. The Noble believes that the primary purpose of communication is the exchange of information and honest opinions.

Noble Strengths

- ❖ **Assertiveness**
- ❖ **Organization**
- ❖ **Focus**
- ❖ **Credibility**
- ❖ **Animation**
- ❖ **Leadership**

Noble Weaknesses

- **Aggressiveness**
- **Inattentiveness**
- **Absoluteness**
- **Intolerance**

The Socratic Communication Premise

The Socratic is the individual who is most concerned with rhetoric and the analysis of details. He/she believes that communication is the primary purpose of verbal interaction.

Socratic Strengths

- **Rhetorical sophistication**
- **Persuasiveness**
- **Analysis**
- **Thoroughness**
- **Credibility**
- **Illustration**

Socratic Weaknesses

- **Rhetorical rigidity**
- **Verbosity**
- **Arrogance**
- **Rudeness**
- **Dogmatism**

The Reflective Communication Premise

The Reflective believes that the primary purpose of communication is the maintenance or advancement of the personal relationship. The accurate transmission of information, expression or opinions, and tangible (clear and definite) results play a secondary role in the communication encounter.

Reflective Strengths

- **Accuracy**
- **Patience**
- **Supportiveness**
- **Openness**
- **Conciliation**
- **Empathy**

Reflective Weaknesses

- **Passiveness**
- **Vulnerability**
- **Indecisiveness**
- **Noncredibility**

CONCLUSION

Someone has very rightly said,

"to be born a gentleman is an accident, but to die a gentleman is an achievement".

To become a gentleman, a successful orator, a good teacher or a good husband /wife, a father or a son, it is believed that one must learn the art and science of effective communication. This will help individuals not only to have good relationship with others, but also to lead a meaningful and successful life.

Thanks !

Speaking in Groups

by

Dr. Vijai N. Giri

Professor of Communication Studies

Dept. of Humanities & Social Sciences

IIT Kharagpur

email: vng@hss.iitkgp.ernet.in

Groups

- A group may be regarded as an organized structure composed of individuals having a common purpose, interdependence, and division of labour. Group members are aware of one another and communicate about the common goal.
- Group communication is all about everyday talk and relationships, especially the relationships between people. Relationships matter a lot in the functioning of the group.
- Whenever, conflicts happen in the groups, it should be seen not simply as a *battle of ideas* but as a *battle between people who have ideas*.

Groups

- **A group can promote its own decision-making capacities by setting a definite agenda, doing a thorough problem analysis, assessing its goals, and thoroughly assessing alternative possibilities. Promotive communication and counteractive communication are ways to keep groups on task.**

Speaking in Groups

- **Most of us find it relatively easy to interact with one or two other people, especially if we know them well or are on good terms with them. But somehow, when the numbers go up, it can all get to be a different story.**
- **Once it goes over our personal threshold, the tension starts to creep in. We might get sweaty palms, or feel our heart racing. Our throat might feel tight. We might find it difficult to concentrate.**

Speaking in Groups

- Different groups have different kinds of communication (some very formal, some quite casual).
- Group decision making largely depends on quality of information and message transmission.
- Effective group members offer advice, knowledge, information, help and support.

Speaking in Groups

- **There are different kinds of groups and different communication strategies are carried out to form different types of group for different purposes, for example, formal group, advisory group, creative group, support group, networking group, etc**
- **Many communication experts focus exclusively on deliberate and purposive persuasion, especially in groups that make formal decisions.**

Speaking in Groups

- **Discussion of group decision making usually involves looking at the most effective forms of communication that help groups reach decisions, often because groups have a set task, purpose, or objective.**
- **Group decision making happens between people in longer-term relationships. Essentially, communication between people transacts group membership, and some obvious relationship issues arise that get affected by communication.**

Fisher's Model of Group Progression

- ***Orientation:*** The group members get to know each other and come to grips with the problems they have convened to deal with.
- ***Conflict:*** The group argues about the possible ways of approaching the problem and begins to find solutions.

Fisher's Model of Group Progression

- ***Emergence:*** Developed from the previous stage, emergence occurs when some daylight of consensus begins to dawn and the group starts to move towards agreement.
- ***Reinforcement:*** The group recognizes that it is reaching consensus and explicitly consolidates that consensus to complete the task.

Fisher's Model of Group Progression

- **Fisher supposed that the type of communication going on in a group would serve to identify as well as promote the particular stage.**
- **Thus, the model has the advantage of helping researchers watch a decision-making group to see where it is headed or to identify issues that might prevent it from moving successfully towards the final conclusive stage.**

Conclusion

- Thus, it can be said that speaking in a group is an art which consists of one's style of communication, having concern and understanding for other members of the group.
- Group interacts not because of their “composition” like (numbers of females or males, old or young) but because of the communicative relationships developed and the kinds of talk shared between specific people involved.

Thanks !
